

Proportions on a typical page: paper 70%, ink 25%, cobalt under 5%. If cobalt starts to feel like a brand colour rather than a highlight, there is too much of it.

Photographs sit in a frame: an outer shell one tone darker than the ground with a hairline, and the image inside with a smaller concentric radius. On dark sections the frame lightens instead. Never a drop shadow, never a border in colour.

Sure Lets & Manage

Residential property management for landlords who expect their agent to be as careful with a property as they are.
